Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 8, 15 - 21 drawn to electrical testing device and method of testing, classified in class 324, subclass 754.
- II. Claims 9 - 14, drawn to electronic package, classified in class 174, subclass 255

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are:

- The invention I has the function as the testing device which is used as the test equipment or tool to test an object. On the other hand, the invention II directs to the structure of the printed circuit board which has nothing to do with the testing tool. Both inventions have totally different functions.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr Richard Billion on 3/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2829

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
